

## TASK NO 2:

```
print("Chatbot: Hi! I'm here to help.")

while True:
    user_input = input("You: ")

    if user_input.lower() == "hi" or user_input.lower() == "hello":
        print("Chatbot: Hi!")

    elif user_input.lower() == "how are you":
        print("Chatbot: I'm good, thanks!")

    elif user_input.lower() == "bye":
        print("Chatbot: See you later!")
        break

    elif user_input.lower() == "thank you":
        print("Chatbot: You're welcome!")

    else:
        print("Chatbot: Sorry, I didn't understand that.")
```
